Tig Welder

Description

Baymar is seeking an experienced TIG Welder. We supply all the tools and equipment except for your PPE.

We're doing welds on stainless steel for small manufactured parts, so a manufacturing background is highly preferred as these welds are not on large objects. Polishing and finishing is part of this job, too. Manual CNC Machine experience is a plus to set up small jobs.

This is a 40 hour per week commitment with flexible hours. We can work on a 1099 or W2 basis. For 1099, must supply proof of own WC liability insurance.

Responsibilities:

- Perform TIG welding on various metal components, including rig and ductwork
- Utilize mechanical knowledge to interpret blueprints, schematics, and technical drawings
- Use plasma cutting equipment to prepare materials for welding
- Adhere to codes and standards for quality and safety in welding processes
- Conduct pipe threading and machining as needed for specific projects
- Operate press brake machine to bend and shape metal parts
- Solder joints and connections as required

Qualifications

Qualifications:

- Proven experience as a TIG welder or similar role
- Proficient in TIG welding techniques and equipment operation
- Strong understanding of mechanical principles and ability to read blueprints and schematics
- Familiarity with codes and standards for welding processes
- Experience with plasma cutting, pipe threading, and machining is a plus
- Detail-oriented with excellent hand-eye coordination and manual dexterity
- Ability to work independently or as part of a team to complete projects efficiently

Note: This job description is not intended to be all-inclusive. The employee may be required to perform other duties as assigned.
